Dear PROPERTY OWNER:

The Maryland State Highway Administration (SHA) is preparing the design engineering for a corridor safety improvement project along US 40 from Chesaco Avenue to Todds Lane in Baltimore County, Maryland. As an adjacent property owner, we are inviting you to review and discuss the proposed improvements that will address vehicular and pedestrian safety needs along the corridor.

The scope of work for the project includes installing a new traffic signal with pedestrian crosswalks at the US 40 at Batavia Farm Road intersection; closing the median opening at the Lawrence Avenue/Lorraine Avenue intersection; maintaining or providing a consistent shoulder adjacent to US 40; reconstructing and reconfiguring concrete curb and gutter and driveway entrances to install 5 foot concrete sidewalk adjacent to eastbound and westbound US 40 throughout the project limits; drainage improvements; and roadway resurfacing.

An aerial graphic showing the proposed roadway safety improvements is enclosed for your reference. The project review meeting has been scheduled as follows:

Date and Time: Monday, October 7, 2013 from 6:30PM to 8:30 PM

Location: Rosedale Library, 6105 Kenwood Avenue, Rosedale, MD 21237

If you have any questions or would like additional information about the project, please contact Mr. Edward Bokman, Chief, Engineering Systems Design, at 410-229-2323 or via email at ebokman@sha.state.md.us. We look forward to meeting with you.

Sincerely,

David W. Peake
Metropolitan District Engineer
Baltimore and Harford Counties

Enclosure: DWP/WW/EB
